

Shayona Cement Corporation

Our Ref No: JNP/26/05/15/03

Date: 26th May, 2015

TO WHOM IT MAY CONCERN

We have engaged Hallmark Technical Services Pvt. Ltd., A-J Tower, 176 Dahanukar Colony, Pune – 411038, Maharashtra, India for Cement Grinding Unit at our factory in KASUNGU, Malawi. The unit consists of One No. Cement Mill (Ball Mill) of 35 TPH Capacity, 1 No. RCC Silo of 3,000 MT Capacity and complete Packing Plant with 2 No. Truck Loader.

Hallmark has provided the following services :

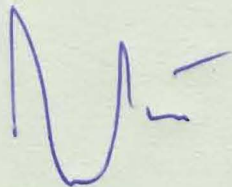

- i) Preparation of Layout, specification of machineries for procurement by us, technical evaluation of the various offers and subsequent to order placement, the approval of GA drawing of suppliers.
- ii) Preparation of General Arrangement Drawings of various sections with load data for civil design and , all support structure drawings,
- iii) Civil & Structural Design of all building, structures of the plant along reinforcement bar details.
- iv) Main receiving substation drawing and complete power system for the plant including specification of electrical equipment, cables, motors where applicable.
- v) Evaluation of technical offers and assisting us in technical discussion before order placement.
- vi) Preparation of PID, BID, etc. along with CCR room equipment for centralized plant operation.
- vii) Complete plant automation system design based on PLC including preparation of specification, evaluation of the offers and subsequent approval of drawings.
- viii) Plant utility system design including for air and water.

The plant has been successfully commissioned in November 2014 and reached more than rated output within short time. Hallmark also provided assistance during commissioning of the plant.

We have found them to be technically competent for cement plant related project engineering. We also very much appreciate their flexibility in the approach while carrying out the engineering activities.

We have no hesitation in recommending them for Cement Plant Projects.

Yours faithfully,
For Shayona Cement Corporation
